IMMUNOCHEMISTRY

AN INTERNATIONAL JOURNAL

VOLUME 11, 1974

U. I. C. C.
FEB 6 1975
LIBRARY

PERGAMON PRESS
OXFORD · NEW YORK · BRAUNSCHWEIG

Regional Editorial Board

Prof. DAN H. CAMPBELL ✣ (Chairman), *California Institute of Technology, Department of Chemistry, Pasadena, California* 91109, *U.S.A.*

Prof. GORDON L. ADA, *Microbiology Department, The John Curtin School of Medical Research, P.O. Box* 334, *Canberra City, A.C.T.* 2601, *Australia.*

Prof. ALAIN BUSSARD, *Institut Pasteur,* 25 *rue du Docteur Roux, Paris, France.*

Prof. HENRI ISLIKER, *Université de Lausanne, Institut de Biochimie,* 21 *rue du Bugnon, Lausanne, Switzerland.*

Prof. FRED KARUSH, *Department of Microbiology, School of Medicine, University of Pennsylvania, Philadelphia, Pennsylvania* 19104, *U.S.A.*

Dr. ROALD S. NEZLIN, *Institute of Molecular Biology, Academy of Science, Vavilov str.* 32, *Moscow W-312, U.S.S.R.*

Editor for Book Reviews

Dr. JUSTINE S. GARVEY, *Department of Biology, Syracuse University, Syracuse, New York* 13210, *U.S.A.*

Aims and Scope

(Revised January 1973)

Immunochemistry involves the specialized disciplines of many fields of physical, biological and medical sciences. Most investigators who are interested in immunochemistry are specialists in one or more of these disciplines and, as a result, immunochemical literature appears in a wide variety of journals and other types of publications. The purpose of *Immunochemistry* is to eliminate the necessity for such dispersed publication by serving as a specific medium for material dealing with the chemical and physical aspects of immunology and related problems. The journal is not intended to be competitive with any of the present journals dealing with general immunology but is to be more specifically a chemical journal dealing with antigens and antibodies, including the biosynthesis of immunoglobulins and other molecular aspects of the immune response.

Several types of articles will be published including Book Reviews. The major category will be *complete and detailed research reports*, which have not been previously published, with each report containing sufficient data to enable other investigators to repeat the study. Brief Communications will be processed and published as quickly as possible and may be in the nature of a preliminary report limited to a space equivalent to 1000 words, including tables. Enough information must be included to justify conclusions. To accelerate their publication, proofs will not be sent to authors but will be checked by the editorial staff of Pergamon Press. Figures and half tone illustrations should only be included if they are absolutely essential and proofs will, in these cases be sent to authors. It is imperative that manuscripts submitted as Brief Communications should be suitable for printing without alteration.

Speculations. This category of subject matter was accepted beginning in 1972. It is intended to provide an opportunity for investigators to elaborate on investigations of the theoretical significance of information presented by other investigators. *Speculations* must be based on reasonable assumptions and facts.

Methodology. This category will provide the opportunity for an investigator to describe new methods or modifications of established methods which are often obscured in a detailed research report. It will also provide an outlet for valuable information on the comparative significance of different immunochemical methods used to obtain similar information.

Review Articles. Review Articles will be published at the invitation of the Editor for Review Articles. Anyone wishing to publish a critical review on a timely subject related to Immunochemistry should contact the Regional Editor for his or her respective region.

Book Reviews. Publishers or authors wishing to have a book reviewed should contact the Book Review Editor.

Announcements. Announcements of forthcoming meetings or conferences of immunochemical interest should be forwarded in duplicate to a Regional Editor for publication.

Summaries of meetings and conferences. Such summaries may be published in the form of abstracts of reports as, for example, abstracts of papers presented at the Symposium on Immunochemistry held in Interlaken, Switzerland in 1970. Summaries of the action of workshops dealing with specific problems such as nomenclature will also be published.

Publishing, Subscription and Advertising Offices

Pergamon Press Ltd., Headington Hill Hall, Oxford OX3 0BW, England

Pergamon Press Inc., Maxwell House, Fairview Park, Elmsford, N.Y. 10523, U.S.A.

Published monthly

Annual Subscription Rate 1975

For libraries, research establishments and all other multiple-reader institutions: ($90.00).

Private individuals, whose departmental libraries subscribe, may obtain this Journal for their personal use at a reduced price of ($20). All subscriptions enquiries should be addressed to The Subscriptions Manager, Headington Hill Hall, Oxford OX3 0BW.

Microform Subscriptions and Back Issues

Current subscriptions and back files on microfilm as well as back issues in the regular editions of all previously published volumes are available from our sole distributors, Microforms International Marketing Corporation Inc. (MicroMark) at the most convenient address:

380 Saw Mill River Road, Elmsford,
New York 10523, U.S.A.

Cowper House, Olney,
Bucks, England.

LIST OF CONTENTS

JANUARY

J. Koketsu and M. Z. Atassi: Immunochemistry of sperm-whale myoglobin—XVI: Accurate delineation of the single region in sequence 1–55 by immunochemical studies of synthetic peptides. Some conclusions concerning antigenic structures of proteins 1

T. K. S. Mukkur, M. R. Szewczuk and D. E. Schmidt, Jr.: Determination of total affinity constant for heterogeneous hapten–antibody interactions 9

G. Odstrchel and P. H. Maurer: Antigenicity of polypeptides: Nature of the immunochemical determinants in poly ($Glu^{60}Ala^{30}Tyr^{10}$) (GAT) against sheep anti-GAT sera 15

M. Reichlin: Quantitative immunological studies on single amino acid substitution in human hemoglobin: Demonstration of specific antibodies to multiple sites 21

W. J. Mandy and L. S. Rodkey: Rabbit IgG heavy chains: Evolutionary divergence of genes coding for constant region 29

M. G. Nicklin and J. Stephen: Recovery of protein antigens from disulphide-linked immunosorbents derived from non-avid sera 35

R. P. Erickson: Inactivation of trypsin by antibodies of high affinity 41

P. Czernichow, A. Reinharz and M. B. Vallotton: Immunochemical analysis of rabbit antibodies against vasopressin 47

S. Liu, E. Johnsen and R. K. Brown: Non-immunogenic regions of oxidized ribonuclease 55

Book Review 61

FEBRUARY

M. T. Perlstein and M. Z. Atassi: Immunochemistry of sperm whale myoglobin—XV. Accurate delineation of the single antigenic reactive region in sequence 1–55 of myoglobin by chemical derivatives of the peptide carrying the region: conclusions relating to antigenic structures of proteins 63

J. R. Stevenson and A. B. Stavitsky: The assay of radioactive antibody to bacteriophage T2 71

S. L. Jeffcoate, D. T. Holland, H. M. Fraser and A. Gunn: Preparation and specificity of antibodies to the decapeptide, luteinizing hormone-releasing hormone (LH-RH) 75

J. E. Herrmann and S. A. Morse: Conjunction of enzymes to anti-poliovirus globulin: effect of enzyme molecular weight on virus neutralization capacity 79

T. P. King, P. S. Norman and N. Tao: Chemical modifications of the major allergen of ragweed pollen, antigen E 83

L. Fuller, E. Iglesias and J. A. Jensen: Purification and properties of the C4 inactivator from nurse shark serum 93

Communications to the Editors

A. L. Grossberg: Summary of the Japan–U.S.A. conference on immunochemistry and immunobiology 99

K. Taketsu, S. Haba, T. Aoki and M. Kitagawa: Enhancing factor on anti-hapten antibody response released from PPDs-stimulated tubercle bacilli-sensitized cells 107

MARCH

F. A. Karlsson: Physical–chemical properties of β_2 microglobulin 111

J. Zikán and I. Miler: Peptic digestion of pig IgM 115

MARCH—*continued*

G. Bordenave: L'idiotypie comparée des IgG et des IgM de lapin anti-*Salmonella abortus-equi* . . 119
G. Bordenave: L'idiotypie comparée des anticorps du sérum, des anticorps du lait, des chaînes polypeptidiques d'IgG et des chaînes polypeptidiques d'IgM de lapins immunisés contre *Salmonella abortus-equi* 133
Y. D. Kim and F. Karush: Equine anti-hapten antibody—VIII. Isoelectric fractions of IgM and 7 S anti-lactose antibody 147
E. M. Prager, M. Fainaru, A. C. Wilson and R. Arnon: Molecular basis of the antigenic difference between two closely related lysozymes of known sequence: Effect of internal substitutions . . 153

Communications to the Editors
G. Virella and I. M. Coelho: Unexpected mobility of human lambda chains in sodium dodecyl sulphate–polyacrylamide gel electrophoresis 157
T. Eskeland and P. Brandtzaeg: Does J chain mediate the combination of 19S IgM and dimeric IgA with the secretory component rather than being necessary for their polymerization? 161
V. Milisauskas, W. R. Bartholomew and N. R. Rose: A method for the immunochemical quantitation of an individual isoenzyme in crude preparations using a specific antiserum 164
S. F. Vitale: Citraconylated rabbit IgG 166
K. Kobayashi, J.-P. Vaerman and J. F. Heremans: A facile method to isolate J-chain from polymeric serum IgA or IgM 169
Announcement 173

APRIL

R. Allan and H. Isliker: Studies on the complement-binding site of rabbit immunoglobulin G—I. Modification of tryptophan residues and their role in anticomplementary activity of rabbit IgG 175
B. A. Fraser and M. F. Mallette: Two new assays for Forssman hapten 181
K. Sakai and R. M. Stroud: The activation of Cls with purified Clr 191
H. J. Callahan, P. A. Liberti and P. H. Maurer: Solvent perturbation difference spectra of a purified sheep antibody 197
J. I. Thorell and I. Larsson: Lactoperoxidase coupled to polyacrylamide for radio-iodination of proteins to high specific activity 203
M. J. Auderset, P. H. Lambert and P. A. Miescher: Purification of human C3 proactivator by affinity chromatography 207

Communication to the Editors
S. Pestka, H. Rosenfeld and R. Harris: Viroimmunoassays: detection of virus-antigen/antibody complexes with an immunoadsorbent 213
Book Review 219
Announcement 221

MAY

D. D. Ourth: Neutralization of diphtheria toxin by human immunoglobulin classes and subunits . . 223
C. H. Self, J. G. Tew, R. G. Cook and A. B. Stavitsky: Solid phase assay of radioactive antibody to soluble antigens 227
L. Yuan and K. W. Sell: Immunochemical nature of schistosomal antigens in the induction of delayed hypersensitivity 235
R. Allan and H. Isliker: Studies on the complement-binding site of rabbit immunoglobulin G—II. The reaction of rabbit IgG and its fragments with Clq 243

S. von Kleist, M. King and P. Burtin: Characterization of a normal, tissular antigen extracted from human colonic tumors 249
S. K. McBurnette and W. J. Mandy: Chemical modification of a rabbit immunoglobulin allotypic specificity 255
S. Lemieux, S. Avrameas and A. E. Bussard: Local hemolysis plaque assay using a new method of coupling antigens on sheep erythrocytes by glutaraldehyde 261
J. J. Marchalonis, R. E. Cone and H. von Boehmer: Surface immunoglobulins of peripheral thymus-derived lymphocytes 271

JUNE

P. V. Gopalakrishnan and F. Karush: Antibody affinity—VI. Synthesis of bivalent lactosyl haptens and their interaction with anti-lactosyl antibodies 279
D. E. Lopatin and E. W. Voss, Jr.: Anti-lysergyl antibody: measurement of binding parameters in IgG fractions 285
C. Sweet, J. Stephen and H. Smith: Purification of influenza viruses using disulphide-linked immunosorbents derived from rabbit antibody 295
V. K. Ghanta and R. N. Hiramoto: Quantitation of antigens by immunoelectrophoresis 305
J. Ambler, J. N. Miller and T. S. C. Orr: Characterization of an allergen isolated from *Ascaris suum*—II. The conformation of allergen A studied by circular dichroism and infra-red spectroscopy 309
R. F. Todd and G. Berke: Functional characterization of membrane components of cytotoxic peritoneal exudate T lymphocytes—I. Search for T-cell receptor activity in lymphocyte membrane fractions 313
D. Senitzer, B. F. Erlanger and S. M. Beiser: Binding of antinucleoside antibody to DNA 321

Communication to the Editors
J. Hirschfeld: Complex and polyfunctional antibodies 325

JULY

D. Kahn, J. M. Andrieu and F. Dray: Evaluation of some binding parameters of hapten–antibody complexes using dextran-coated charcoal to separate the bound and free fractions 327
D. E. Lopatin and E. W. Voss, Jr.: Avidity in immunoadsorption of IgG antibodies 333
M. Tomana, W. Niedermeier and F. Skvaril: Carbohydrate composition and complement fixation of human monoclonal IgG 337
A. C. Wang, J. V. Wells, H. H. Fudenberg and J. Gergely: Chemical analyses of cryoglobulins . . . 341
B. Bonavida, E. Mozes, G. M. Shearer and M. Sela: Immunological unresponsiveness induced in adult mice to synthetic polypeptides built on multichain polyproline and multichain polyalanine 347
D. Carson and H. Metzger: The separation of rabbit anti-dinitrophenyl IgG antibodies on the basis of combining site depth 355
J. O. Minta and I. H. Lepow: Studies on the sub-unit structure of human properdin 361
D. V. Gold and F. Miller: Characterization of human colonic mucoprotein antigen 369
L. T. L. Wong, L. H. Piette, J. R. Little and J. C. Hsia: Stereospecificity of murine myeloma protein-315 to enantiomeric spin labeled dinitrophenyl hapten 377

Communication to the Editors
M. J. Escribano: Use of sephadex G-10 to remove the dinitrophenol-hapten from dinitrophenol antidinitrophenyl antibodies complexes 381
Book Reviews 385
List of Recent Books on Immunochemistry and Related Areas of Research 389

AUGUST

T. Suzuki, S. Tanaka and Y. Kawanishi: An improved method for preparation of stable antigen coupled erythrocytes for passive hemolysis 391
E. Appella, A. Chersi, J. Rejnek, R. Reisfeld and R. Mage: Rabbit immunoglobulin lambda chains: Isolation and amino acid sequence of cysteine-containing peptides 395
S. E. Zimmerman and F. Haurowitz: Preferential allotypic expression of anti-hapten response in first and second generation heterozygous rabbits of al,3 allotype 403
C. Bron and G. Gallagher: Immunochemical studies of human red cell membrane proteins excreted in normal urine 409
J. P. Lyet and D. E. Normansell: Low molecular weight rheumatoid factors in rheumatoid arthritis sera 417
B. J. Dyce and B. J. Haverback: Free and bound carcinoembryonic antigen in neoplasms and in normal adult and fetal tissue 423
J. J. Thompson and L. G. Hoffmann: Cooperative binding of a complement component to antigen–antibody complexes—I: Complexes containing rabbit IgG antibody 431
C. H. Schneider, S. Lazary, W. Wirz and A. L. de Weck: Solubility enhancing haptens: Preparation and some properties of conjugates with dinitrocarboxyphenyl (DNCP) groups 447
S. J. Gross, J. D. Grant, S. R. Wong, R. Schuster, P. Lomax and D. H. Campbell: Critical antigenic determinants for production of antibody to distinguish morphine from heroin, codeine and dextromethorphan 453
G. C. Meinke, P. H. Sigrist and H. L. Spiegelberg: The NH_2-terminal amino acid sequence of a κ and a λ Bence–Jones cryoglobulin 457
J. S. Gallagher and E. W. Voss, Jr.: Conformational state of chicken 7S immunoglobulin 461
T. Shinomiya and J. Koyama: Naturally-occurring antibodies reacting with some buried determinants of homologous IgG exposed by spleen protease digestion 467
C. R. Alving, J. W. Fowble and K. C. Joseph: Comparative properties of four galactosyl lipids as antigens in liposomes 475
Y. Nakagawa, W.-Y. V. Liaw, A. H. Hunt and B. Jirgensons: Conformational transitions of immunoglobulin fragments by citraconylation of their lysine side chains 483
G. L. Rosenquist and A. M. Holmquist: The specificity of antibodies directed to procine gastrin . . 489
M. Z. Atassi, M. C. Rosemblatt and A. F. S. A. Habeeb: Enzymic and immunochemical properties of lysozyme—VIII. Modification of two carboxyl groups and their role in the antigenic reactivity 495
S.-M. Chien, T. Lemanski and R. D. Poretz: The anti-I activity of the *Sophora japonica* lectin . . . 501
G. F. Bryce: Development of a radioimmunoassay for luteotropin releasing hormone (LRH) and thyrotropin releasing hormone (TRH) 507

Speculation
F. C. Westall: Released myelin basic protein: The immunogenic factor? 513

Communications to the Editors
R. S. Nezlin, T. I. Vengerova, O. V. Rokhlin and H. K. G. Machulla: Allotypic marker of kappa light chains of rat immunoglobulins localized in the constant region of the chain 517
J. A. Räsänen: The calculation of antigen concentrations in the single radial immunodiffusion . . 519

E. L. Romano, C. Stolinski and N. C. Hughes-Jones: An antiglobulin reagent labelled with colloidal gold for use in electron microscopy 521
Book Reviews 523

SEPTEMBER

M. P. Dierich, U. Hadding, W. König, M. Limbert, H.-U. Schorlemmer and D. Bitter-Suermann: Factor D in the alternate pathway of complement activation: Purification, physicochemical characterization and functional role 527
R. C. Lauer and B. F. Erlanger: An enzyme-immunoassay of antibody specific for adenosine using β-galactosidase 533
J. J. Thompson and L. G. Hoffman: Cooperative binding of a complement component to antigen–antibody complexes—II. Effect of variations in temperature and ionic strength . . . 537
R. J. Boackle, K. M. Pruitt and J. Mestecky: The interactions of human complement with interfacially aggregated preparations of human secretory IgA 543
A. Lange, A. R. Zeiger and P. H. Maurer: The immunochemistry of a linear polymer and a branched copolymer containing the sequence Glu-Lys-Ala-Gly 549
A. R. Zeiger and P. H. Maurer: The immunochemistry of (L-Ala-D-Glu-L-Lys-D-Ala-Gly)$_n$: Antibodies of restricted specificity 555
M. Aubery et R. Bourrillon: Interaction de la lectine de Robinia pseudo acacia et de la Concanavaline A avec les surfaces membranaires des hepatocytes normaux et tumoraux de rat 565
R. J. Carrico, R. Beagle, M. Usategui-Gomez and F. Deinhardt: A radioimmunoassay specific for the antigenic determinants exposed by pepsin digestion of human immunoglobulin G 573
B. A. Fraser and M. F. Mallette: Structure of Forssman hapten glycosphingolipid from sheep erythrocytes 581
J.-L. Guesdon and S. Avrameas: An immunoenzymatic method for measuring low concentrations of antigens by single radial diffusion 595
C. E. Bolton: *In vitro* studies of IgG catabolism by human leukocytes 599
A. Beckers, P. Querinjean and H. Bazin: Allotypes of rat immunoglobulins—II. Distribution of the allotypes of kappa and alpha chain loci in different inbred strains of rats 605

Communications to the Editors
G. A. Mitchell, P. V. Smutny, K. W. Chambliss and B. D. Levin: Method for the determination of tracer antigen specific activity by radioimmunoassay 611
D. Catty and T. D. King: The effect of polyethylene glycol (PEG) on precipitation of mouse and rabbit immunoglobulin allotypes in microradioimmunoassays 615
A. J. L. Macario and E. C. de Macario: Synthesis of low affinity antibody molecules during the decline of the immune response 619

OCTOBER

R. W. Newcomb and C. A. Sutoris: Comparative studies on human and rabbit exocrine IgA antibodies to an albumin 623
G. A. Hashim and R. D. Sharpe: Experimental allergic encephalomyelitis: Structural specificity of determinants for delayed hypersensitivity 633
M. J. Hoffmeister and E. W. Voss, Jr.: Binding of ϵ-DNP-L-lysine exceeding two moles by purified chicken IgG anti-DNP antibody 641
E. D. Day and O. M. Pitts: Radioimmunoassay of myelin basic protein in sodium sulfate 651
C. DeLisi and B. Goldstein: On the mechanism of hemolytic plaque inhibition 661

OCTOBER—*continued*

L. S. Cram and J. C. Forslund: A quantitative method for evaluating fluorescent antibodies and the conjugation process 667
H. Tsunoo, T. Sasazuki, H. Sato and H. Nakajima: Effect of haptoglobin on immunological activity of hemoglobin 673

Communications to the Editors
Yu. A. Zagyansky and E. M. Gavrilova: Segmental flexibility of human myeloma immunoglobulins A 681
Erratum 683

NOVEMBER

Y. T. Kim, T. P. Werblin and G. W. Siskind: Distribution of antibody affinities—II. Fractionation of antibody with respect to its hapten binding affinity 685
I. B. Jocius and M. A. Leon: Properties of a cell bound homogenous murine IgM anti-dextran—I. Passive lysis of dextran-coated erythrocytes 691
I. B. Jocius and M. A. Leon: Properties of a cell-bound homogenous murine IgM anti-dextran—II. Reactions of cell-bound IgM with dextran and hapten 697
C. B. Laurell and E. Thulin: Complexes in plasma between light chain κ immunoglobulins and α_1-anti-trypsin respectively prealbumin 703
S. Sambury, P. Chowdhury and A. Saha: Studies on cryoprecipitation: Covalent structure of a human IgG cryoglobulin and its gelation characteristics 711
A. Shimizu, S. Watanabe, Y. Yamamura and F. W. Putman: Tryptic digestion of immunoglobulin M in urea: Conformational lability of the middle part of the IgM molecule 719
J. Uki, C. A. Young and T. Suzuki: A 22S cryomacroglobulin with antibody-like activity—I. Physicochemical characterization and modification of its cryoproperties 729
S. B. Shukla and V. E. Headings: Quantitation of hemoglobulins by immunodiffusion: Specific antibodies to hemoglobins A_1, S and F 741
R. J. Hill: Conformational transitions occurring in goat anti-alanyl antibody as a result of pH changes 747

Communications to the Editors
N. R. Lynch and K. J. Turner: Antigenic homology between marsupial homocytotropic antibody and human IgE 753
H. R. Lukens, W. B. Dandliker and A. Jaffer: The identification of IgE in human head hair . . . 757
J. H. Humphrey and I. Batty: International reference preparation for human serum IgG, IgA, IgM 759

Book Review 761
List of Recent Books on Immunochemistry and Related Areas of Research 763

DECEMBER

M. E. Cordal and R. A. Margni: Isolation, purification and biological properties of horse precipitating and nonprecipitating antibodies 765
M. Pecec and N. Voiculetz: An antibody sandwich method for the radioimmunoassay of human α-fetoprotein 771
Yu. S. Ovodov, R. G. Gorshkova and S. V. Tomshich: Chemical and immunochemical studies on *Yersinia pseudotuberculosis* lipopolysaccharides—II. Lipopolysaccharides from type IB microorganism 777

L. G. Hoffman: Variations in hemolytic efficiency of isoelectric antibody fractions 781
E. Soru and O. Zaharia: Immunoenzymology of L-asparaginase from the BCG strain of *Mycobacterium bovis* 791
O. J. Bjerrum, A. Ingild and H. Lowenstein: Carbamylation of antibodies: Investigation of the number of converted amino groups, electrophoretic mobility and immunoprecipitation titre . . 797
F. Franěk, J. Doskočil and L. Šimek: Different types of precipitating antibodies in early and late porcine anti-dinitrophenyl sera 803
J. H. Westwood, E. M. Bessell, M. A. Bukhari, P. Thomas and J. M. Walker: Studies on the structure of the carcinoembryonic antigen—I. Some deductions on the basis of chemical degradations . 811

Communications to the Editors
R. S. D. Read, J. C. Cox, H. A. Ward and R. C. Nairn: Conditions for purification of anti-*Brucella* by immunoadsorption and elution 819
C. Sweet, J. Stephen and H. Smith: The behaviour of antigenically related influenza viruses of differing virulence on disulphide-linked immunosorbents 823
